Coping Stones UK Ltd

About us

Welcome to Coping Stones UK. We are a leading manufacturer of precast concrete Coping Stones and Pier Caps across the UK.

Coping stones add the finishing touch to any wall and protect the brickwork from potential water damage. Our extensive range of coping stones are available in a range of differing styles and colours allowing you to compliment, or contrast, with your brickwork and paving.

We can also create bespoke concrete Coping Stones and Pier Caps to your personal specifications – Our skilled joiners will work to your exact specification to produce your unique product.

All of our mixes are designed to give the concrete the highest quality surface finishes making sure the concrete has great impermeability giving the edge to retain its colour and longevity through the harshest of weather conditions.

This coupled with our perfected curing practices of perfect temperature and humidity allows us to produce some of the highest quality concrete coping stones and pier caps on the market.

Please browse through our brochure and view our extensive range of Coping Stones and Pier Caps and order your preferred choice directly through your local supplier.

PLEASE NOTE all swatch sample colours are matched as close as possible for printing.
Please check stone samples on your local suppliers display stand for exact colour finishes.
All of our products are available in three distinct finishes: Standard, Rustic Stone, and Resin.

DYES

Concrete Dye 500g

Concrete Dye 1kg

Concrete Dye 5kg

If you require your mortar joints to be the same colour as your copings or if there is any other colour specifications you may have please feel free to contact your local supplier for a pigment/dye that we can supply for your mix or feel free to contact us directly

RESIN

Concrete Resin 1 Litre Bottle

Resin typically lasts around 3-5 years. Feel free to contact your local supplier to re-apply the resin to your copings in order to give them an uplift or to simply maintain them. This will keep the colour vibrant and longevity of the concrete for years to come by protecting the stones from the elements. Contact us directly if you need advice on self application of resin
